Project Overview

NIAC Intern: Amy Wolterman **Major:** Mechanical Engineering

School: University of Nebraska-Lincoln

Industrial Assessments

- Vishay-Dale in Columbus, NE BD in Holdrege NE
- Noah's Ark in Hastings, NE
- Nebraska Nitrogen in Geneva, NE

During the course of the summer, I completed 4 assessments for the University of Nebraska Lincoln's Industrial Assessment Center (NIAC). These trips consisted of traveling to facilities in Columbus, NE; Holdridge, NE; Hastings, IA; and Geneva, NE. I served as analyst, safety manager, equipment coordinator, and lead analyst on these assessments. The goal of each facility assessment was to identify specific assessment recommendations (ARs) that could be implemented to reduce overall operating costs and utility consumption.

Results:

The potential benefits of the recommendations over the summer are summarized in table 1-1 below.

Table 1-1: Overall Summary of Assessment Recommendations

| AR Recommendation | Energy Savings | GHG Savings MTCO ₂ e | Annual Savings (\$/year) | Implementation Cost (\$) | Payback Period (years) | Other Savings |
|----------------------|-------------------|---------------------------------------|--------------------------------|-----------------------------|------------------------------|------------------|
| Replace Boiler with | 84,000 | 3,306 | 280,467 | 165,000 | 0.6 | |
| Water Heaters | MMBTU | | | | | |
| Reduce Compressed | 18,855,739 | 17,988 | 101,810 | 900 | < 0.1 | |
| Air Leaks | kWh/year | | | | | |
| Compressed Air | 1,263,789 | 1,206 | 56,446 | 20,000 | 0.4 | |
| Management Plan | kWh/year | | | | | |
| Implement VFDs in | 39,858 | 17.2 | 12,761 | 24,000 | 1.6 | |
| BOG Fans | kWh/year | | | | | |
| Brine Reclamation | N/A | N/A | 10,312 | 3,180 | 0.3 | 55,000 |
